

GENERAL AND APPLIED PLANT PHYSIOLOGY

Year 2010, Volume XXXVI, Issue 1–2, Pages 03–112

Available online at www.bio21.bas.bg/ipp/

CONTENTS

- Dimitrov I., A. Mikova, P. Alexandrova*
The influence of balanced mineral fertilization on net assimilation rate during the growing period of maize cultivated on two soil types 03–07
- Koleva L., I. Semerdjieva, A. Nikolova, A. Vassilev*
Comparative morphological and histological study on zinc- and cadmium-treated durum wheat plants with similar growth inhibition 08–11
- Benkova M., L. Dimova, T. Simeonova*
Uptake of major and trace elements by grass biomass after amelioration of degraded soil 12–16
- Chipilski R., B. Andonov*
Evaluation of germplasm and new breeding cultivars and lines winter wheat (*Triticum aestivum* L.) for drought tolerance 17–23
- Hadjiivanova C., N. Tzvetkova*
Acid phosphatase activity in sun-exposed and shade beech (*Fagus sylvatica* L.) leaves 24–27
- Nikolova I., N. Georgieva*
Use of preparations with different biological effect in spring vetch and their influence on the productivity and insect pest density 28–37
- Georgieva N., I. Nikolova*
Study on the influence of new biologically active substances on the grain yield and density of *Acyrtosyphon pisi* Kalt. (Homoptera, Aphidodae) in spring forage pea 38–46
- Geneva M., M. Hristozkova, P. Yonova, M. Boychinova, I. Stancheva*
Effect of endomycorrhizal colonization with *Glomus intraradices* on growth and antioxidant capacity of *Sideritis scardica* Griseb 47–54
- Kaymakanova M., L. Lyubenova, P. Schröder, N. Stoeva*
Salt stress and glutathione-dependent enzyme activities in bean (*Phaseolus vulgaris* L.) 55–59

CONTENTS CONTINUED INSIDE

CONTENTS CONTINUED

| | |
|--|---------|
| <i>Koleva L.</i> Mineral nutrients content in zinc- and cadmium-treated durum wheat plants with similar growth inhibition | 60–63 |
| <i>Anastasov H.</i> Influence of imazamox on some anatomic indices in the leaves of sunflower plant (<i>Helianthus annuus</i> L.) | 64–68 |
| <i>Kornova K., S. Popov</i> Effect of growth regulators for <i>ex vitro</i> rooting adaptation of <i>in vitro</i> propagated plants to non-sterile conditions | 69–72 |
| <i>Perfanova Y., A. Markova, R. Altimirska</i> Effect of inoculation with nitrogen fixing bacteria on chickpea (<i>Cicer arietinum</i> L.) yield and rhizosphere microflora | 73–77 |
| <i>Kolev K., A. Krumova</i> Possibilities for improving antioxidant activity of soybean (<i>Glicine max</i> L.) seeds and plant productivity after treatment with conformation changed lisozyme (thermodase) | 78–86 |
| <i>Maslenkova L.</i> Thermoluminescence from photosynthesizing systems as a method for detection of early plant stress symptoms. Effect of desiccation on thermoluminescence emission parameters in mesophytic and poikilohydric plants | 87–99 |
| <i>Rakleova G., A. Keightley, I. Panchev, I. Tsacheva, M. Tchorbadjieva</i> Cysteine proteinases and somatic embryogenesis in suspension cultures of orchardgrass (<i>Dactylis glomerata</i> L.) | 100–109 |
| Instructions to authors | 110 |
| Conference sponsors | 111–112 |
